Stratasys J735 and J750
UNLEASH YOUR IMAGINATION WITH NEVER-BEFORE-SEEN MULTI-MATERIAL CAPABILITIES
Unmatched Product Realism
The Stratasys J735™ and J750™ 3D Printers deliver unrivaled aesthetic performance including true, full-color capability with texture mapping and color gradients.

Create prototypes that look, feel and operate like finished products, without the need for painting or assembly, thanks to these printers’ wide range of material properties. With an astounding 500,000+ color combinations to choose from and multi-material capability, the Stratasys J735 and Stratasys J750 allow you to bring even your most imaginative ideas to life.

Maximum Versatility
Take advantage of unparalleled 3D printing versatility. Channel a range of applications that previously required multiple systems to achieve all in one package with a vast array of colors and material properties, from rigid to flexible and opaque to transparent, and the ability to print many diverse materials in one job or part. Print parts that feature Digital ABS Plus™ alongside a variety of flexible Shore A values and/or translucencies. With the fastest PolyJet multi-material 3D printer, you won’t sacrifice time for part intricacy and complexity.
**Fast and Efficient Workflow**

Streamline your workflow with GrabCAD Print™. GrabCAD Print allows you to print directly from your favorite professional CAD formats, saving hours of time usually spent converting and fixing STL files. Lean on smart default settings, tooltips and notifications to guide you through a seamless printing process. Work with detailed views of your model, tray, and slice preview so you can make necessary adjustments before going to print.

The large, six-material capacity of the Stratasys J735 and J750 means you can load your most used resins and avoid downtime associated with material changeovers. Print simulated production plastics, like Digital ABS Plus, in half the time or with twice the resolution. Along with the selected model material, the 3D printer features two support material options: SUP705, removed with a WaterJet; and SUP706, which is easily removed and soluble for automated post-processing and increased geometric freedom to print complex and delicate features and small cavities.

**Achieve ROI Quickly**

With high efficiency and low cost per part, you’ll realize ROI in no time with the Stratasys J735 and J750. No matter what industry or application, these two 3D printers can take on any 3D printing need and adapt for your changing requirements.

### Product Specifications

| **Model Materials**                  | Vero™ family of opaque materials including neutral shades and vibrant colors like VeroMagentaV and VeroYellowV  
Tango™ and Agilus30™ families of flexible materials  
Transparent VeroClear™ and RG6720 |
|--------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| **Digital Model Materials**          | Unlimited number of composite materials including:  
Over 500,000 colors  
Digital ABS Plus and Digital ABS2 Plus™ in ivory and green  
Rubber-like materials in a variety of Shore A values  
Translucent color tints  
User-developed digital materials with GrabCAD Voxel Print |
| **Support Materials**                | SUP705 (WaterJet removable)  
SUP706 (soluble) |
| **Build Size**                       | Stratasys J735: 350 x 350 x 200 mm (13.8 x 13.8 x 7.9 in.)  
Stratasys J750: 490 x 390 x 200 mm (19.3 x 15.35 x 7.9 in.) |
| **Layer Thickness**                  | Horizontal build layers down to 14 microns (0.00055 in.) |
| **Workstation Compatibility**        | Windows 7 and 8.1 |
| **Network Connectivity**             | LAN - TCP/IP |
| **System Size and Weight**           | 1400 x 1260 x 1100 mm (55.1 x 49.6 x 43.4 in.); 430 kg (948 lbs.)  
Material Cabinet: 670 x 1,170 x 640 mm (26.4 x 46.1 x 25.2 in.); 152 kg (335 lbs.) |
| **Operating Conditions**             | Temperature 18-25 °C (64-77 °F); relative humidity 30-70% (non-condensing) |
| **Power Requirements**               | 100-120 VAC, 50-60 Hz, 13.5 A, 1 phase  
220-240 VAC, 50-60 Hz, 7 A, 1 phase |
| **Regulatory Compliance**            | CE, FCC, EAC |
| **Software**                         | GrabCAD Print, including the optional add-on GrabCAD Voxel Print™ |
| **Build Modes**                      | High Speed:  
up to 3 base resins, 27-micron (0.001 in.) resolution  
High Quality:  
up to 6 base resins, 14-micron (0.00055 in.) resolution  
High Mix:  
up to 6 base resins, 27-micron (0.001 in.) resolution |
| **Accuracy**                         | Up to 200 microns for full model size (for rigid materials only, depending on geometry, build parameters and model orientation) |
Stratasys J735 and J750
